

Demonstration of work
pdf editor.
This text is aligned
on the right edge.

This is an example of header text

This is an example of plain text, left-aligned, with different formatting of individual words, such as **bold**, *italic*, ***bold italic***, ~~strike through text~~.

This is an example of a regular list:

- item 1 of the list
- item 2 of the list
- item 3 of the list

This is an example of a numbered list:

1. numbered item
2. next item on a numbered list
3. last item in a numbered list

This is an example of indent text.

This is an example of a slightly larger text indent.

And more retreat...

This is an example of text that is centered. This is an example of text that is centered. This is an example of text that is centered. This is an example of text that is centered. This is an example of text that is centered.

This is an example of table:

Column 1	Column 2	Column 3	Column 4
some content	some content	some content	some content
some content	some content	some content	some content
some content	some content	some content	some content
some content	some content	some content	some content

You can edit the tables, including adding and deleting rows and columns in them.

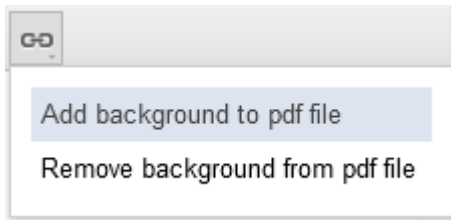

This is an example of inserting a picture:

You can add a horizontal line:

The editor allows you to add a background texture that is displayed under the entire contents of the document. This is done through the rightmost button on the top panel of the editor:

It is also possible to change the [text color](#), the background under the text, [the text color and the background below the text](#).
